I am writing to apply for the Product Marketing Manager position at Workist GmbH. The opportunity to build the product marketing function from the ground up, working at the intersection of AI, B2B SaaS, and go-to-market strategy, is what draws me to this role.

My background is in full-stack software engineering with a strong focus on AI-powered applications. Through hands-on project development, I have built and launched platforms that integrate AI assistants, payment gateways, real-time communication, and role-based access control. This technical foundation gives me a practical understanding of how complex products are architected, what makes them valuable to users, and how to communicate that value clearly.

One area that particularly interests me is the emphasis on positioning, messaging, and cross-functional collaboration. In my work developing AI-powered financial and real estate applications, I collaborated closely with product and engineering teams to define feature requirements, align on user workflows, and support go-to-market efforts. I am comfortable translating technical capabilities into clear, compelling narratives for different audiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to Workist’s product marketing efforts.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
