I am writing to express my interest in the Senior Estimator position at Aecon Group Inc. While my professional background is in software engineering rather than construction estimating, I bring a strong foundation in data analysis, project coordination, and technical problem-solving that can contribute to your estimating team.

Through my work as a full-stack developer, I have developed strong analytical skills working with complex data systems, databases, and cost-related calculations. I am experienced in reading and interpreting technical documentation, managing detailed project information, and maintaining accurate records. These skills translate well to the responsibilities of preparing cost estimates, analyzing project requirements, and maintaining historical cost data.

I have worked on projects that required careful attention to budgets, timelines, and resource allocation. In my previous roles, I collaborated with cross-functional teams, communicated with stakeholders, and ensured that project deliverables met specifications. I am comfortable working with spreadsheets, databases, and software tools to organize and analyze information.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and organizational skills can support Aecon’s estimating operations.

Sincerely,

Md Shahanur Islam Shagor
