I am writing to express my interest in the Creative Director role for BUBLIK at Strange Face. While my professional background is in software engineering and AI, I understand that launching a film requires a clear narrative, a strategic content rollout, and the ability to convert an audience into active backers. These are challenges I have tackled in building and launching digital products from the ground up.

In my work as a full-stack developer, I have led the end-to-end creation of platforms where user engagement and conversion were the primary metrics. For example, I built a multi-vendor e-commerce ecosystem that required coordinating multiple stakeholder types, crafting a clear user journey, and ensuring the platform told a coherent story from onboarding to transaction. The same principles apply to a film campaign: knowing how to tease, reveal, and convert an audience.

I have also developed AI-powered applications where the user experience and the narrative of the product were critical to adoption. Building the Smart Finance platform meant designing a system that users would trust and return to, which required a clear content strategy and a focus on how the product communicated its value. I approach every project as a story that needs to be told effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my experience in building and launching products can contribute to a successful Kickstarter and social campaign for BUBLIK.

Sincerely,

Md Shahanur Islam Shagor
