I am writing to apply for the Patient Advocate position at Cedar. Your mission to make healthcare more affordable and accessible through data science and personalization is something I find genuinely meaningful. The idea of helping patients navigate the complexity of medical billing and improving their overall experience resonates with me.

Although my professional background is in software engineering, I have developed strong communication, problem-solving, and client-facing skills through years of direct collaboration with stakeholders and end-users. I am comfortable handling inquiries via phone, chat, and email, and I know how to listen carefully, explain clearly, and follow through on commitments.

In my previous work as a Web Developer, I regularly interacted with clients to understand their needs, troubleshoot issues, and deliver solutions on time. I learned to manage multiple priorities, stay organized under pressure, and communicate effectively with both technical and non-technical people. These experiences have prepared me to handle the patient-facing responsibilities of this role.

I am a self-motivated individual who works well independently in remote environments. I pay close attention to detail and am comfortable toggling between multiple systems and tools. I am also open to ambiguity and changing priorities, which I understand is part of working in a fast-growing healthcare technology company.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
