I am writing to apply for the Marketing Analyst position at Custom Surgical GmbH. Your work at the intersection of hardware and software, building AI tools that improve global eye health, is genuinely compelling. I am drawn to the ownership-driven culture and the opportunity to contribute directly to campaigns, content, and operational workflows that drive real pipeline impact.

Although my professional background is in software engineering, I bring a strong analytical and technical foundation that aligns well with the execution-focused nature of this role. Through my experience building and deploying full-stack applications, I have developed a disciplined approach to tracking metrics, running experiments, and optimizing performance. I am comfortable working with data, dashboards, and reporting tools to monitor outcomes and flag opportunities.

One area that particularly interests me is the campaign and analytics side of this position. In previous work, I have built systems that required continuous monitoring of key performance indicators, A/B testing, and iterative improvements based on data. I am confident I can apply that same structured, results-oriented mindset to managing Google Ads campaigns, optimizing toward pipeline metrics, and maintaining clean, actionable data in HubSpot.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
