I am writing to apply for the Social Media Content Creator role with Wripple's retail grocery client. Although my professional background is in software engineering, I bring a strong foundation in visual communication, user engagement, and content creation that aligns well with this opportunity.

Through my work as a full-stack developer, I have designed and built user interfaces that prioritize clarity, storytelling, and audience engagement. I am proficient with Figma for design and have experience creating polished visual content for web platforms. I understand how to structure information and visuals to capture attention and drive action.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in New York and available for remote, project-based work. I have attached my CV and look forward to discussing how I can contribute to your client's brand presence on Instagram and TikTok.

Sincerely,

Md Shahanur Islam Shagor
