I am writing to apply for the General Virtual Assistant position at Filipino Contractors. Your mission of helping companies streamline operations and build efficient remote teams aligns with my own working style and experience.

Through my professional experience as a remote web developer, I have developed strong organizational and communication skills that transfer well to a virtual assistant role. I am comfortable managing data, organizing files, coordinating schedules, and handling correspondence across email and instant messaging platforms.

One area where I am particularly effective is in maintaining structured workflows and clear communication. I have experience preparing reports, tracking project details, and ensuring that information is organized and accessible. I am proactive about following up on tasks and keeping things moving without constant supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am comfortable working US hours and have the required technical setup. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
