I am writing to express my interest in the Trim position at Clayton. I understand that Clayton is a values-driven home builder focused on attainable housing and sustainable practices, and I appreciate the company's commitment to creating a supportive work environment.

My background is in full-stack web development, with 4 years of professional experience building and maintaining production applications using Laravel, Next.js, React, and MySQL. I have worked on both backend APIs and frontend interfaces, delivering features that are reliable, responsive, and user-friendly.

In my previous role as a Web Developer at Explo-IT, I designed and developed scalable web applications using Laravel for the backend and Next.js for the frontend. I built RESTful APIs, implemented authentication and role-based access control, integrated payment gateways, and optimized database performance through query tuning and caching strategies. I also deployed applications on Linux servers using Nginx, Docker, and CI/CD pipelines.

One project that reflects my approach is the Multivendor E-commerce Management Ecosystem, a full-stack marketplace platform built with Laravel and MySQL. The system connects customers, sellers, and logistics teams through role-based access and RESTful APIs, demonstrating my ability to handle complex business logic and multi-role coordination.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Clayton's team.

Sincerely,

Md Shahanur Islam Shagor
