I am writing to apply for the Computer Science Specialist position at G.S. International Public School. With a background in software engineering and hands-on experience in Python development, I am well positioned to contribute to your institution's technology and computer science initiatives.

Through my internship in Python at Global IT, I built and maintained web applications using Python and Django, focusing on scalable backend architecture. I designed and optimized PostgreSQL databases, worked on bug fixing and performance tuning, and collaborated on real-world projects following clean code practices and version control workflows. This experience gave me a solid foundation in Python programming and practical software engineering.

One area that particularly interests me is applying technical skills in an educational context. My experience includes developing full-stack applications, integrating APIs, and deploying systems on Linux servers. I am comfortable working with Python, databases, and modern development tools, and I enjoy breaking down technical concepts into clear, understandable pieces.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of G.S. International Public School. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
