I am writing to apply for the Team Lead Customer Care position at Capgemini. Your company's focus on using technology to deliver tangible business value, combined with a collaborative global community, is something I find genuinely compelling.

While my professional background is primarily in software engineering, I have developed strong communication, troubleshooting, and problem-solving skills that are directly relevant to this role. In my previous work as a Web Developer, I regularly interacted with stakeholders to understand issues, de-escalate concerns, and deliver clear solutions under time constraints. These experiences have built a foundation in customer-centric thinking and effective communication.

I am comfortable working independently and managing multiple tasks simultaneously. My technical background gives me an edge in understanding and resolving complex customer issues efficiently. I am also experienced in using various software tools and can quickly adapt to new systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can contribute to your team and help maintain the high standards of customer satisfaction Capgemini is known for. I have attached my CV for your review and welcome the opportunity to discuss how my skills align with your needs.

Sincerely,

Md Shahanur Islam Shagor
