I am writing to apply for the Senior Backend Software Developer position at BitPay. BitPay's role as a leading blockchain payments company serving merchants across six continents is impressive, and I am interested in contributing to the development of scalable backend systems that power cryptocurrency payments.

My professional experience centers on backend development using Node.js and MongoDB, which are the primary technologies for this role. I have built and maintained production-ready REST APIs, implemented secure authentication and role-based access control, and worked with databases including MongoDB, MySQL, and PostgreSQL. I focus on writing clean, maintainable code and ensuring system reliability through thorough testing and documentation.

In my previous role as a Web Developer at Explo-IT, I developed scalable web applications using Laravel and Next.js, integrated RESTful APIs for seamless data exchange, and optimized application performance through Eloquent query tuning, caching strategies, and database indexing. I also delivered real-time features using WebSockets and implemented secure payment gateways. This experience has given me a strong foundation in building backend systems that are both scalable and maintainable.

One area that particularly interests me is the opportunity to work on blockchain and fintech systems. I have research experience with blockchain technology through my work on OmniGuard V2X, a privacy-preserving blockchain framework for autonomous vehicle networks that integrates Zero-Knowledge Proofs and post-quantum cryptography. While this is research-focused, it demonstrates my ability to work with decentralized systems and secure communication protocols.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and welcome the opportunity to discuss how my background aligns with BitPay's needs.

Sincerely,

Md Shahanur Islam Shagor
