I am writing to apply for the Human Resources Administrator position at Lingraphica. Your mission to improve communication and quality of life for people with aphasia through speech-generating devices is genuinely meaningful, and I would be proud to support that work through this role.

Although my professional background is in software engineering, I bring strong organizational skills, attention to detail, and experience managing complex workflows and data systems. I am comfortable handling confidential information with discretion, coordinating schedules, and supporting administrative processes efficiently.

In my previous work as a Web Developer, I maintained accurate records, tracked project tasks, and communicated clearly with stakeholders. I am proficient with digital tools and can quickly adapt to HR systems, databases, and intranet platforms. I am also experienced in maintaining documentation and ensuring data accuracy across systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for the part-time schedule and willing to travel for in-person meetings as required. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
