I am writing to express my interest in the Junior Data Analyst position at Caterpillar Inc. As a software engineering student with practical experience in database management and data-driven application development, I am eager to contribute to your analytics team.

Through my academic and project work, I have developed strong skills in SQL, including joins, aggregations, and subqueries, as well as experience with MySQL and PostgreSQL. I have also worked with Python for data processing tasks and am comfortable with data cleaning and validation workflows.

In previous projects, I built full-stack applications that required collecting, organizing, and analyzing data from multiple sources to support business logic and reporting. This involved creating structured queries, maintaining data integrity, and presenting information clearly through dashboards and visual interfaces.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my analytical skills and attention to detail can support Caterpillar’s data-driven decision-making.

Sincerely,

Md Shahanur Islam Shagor
