I am writing to apply for the Leiter Bauingenieurswesen position at Impledio GmbH. After reviewing the job description, I understand that this role requires a civil engineering background with expertise in structural engineering, production drawings, and static calculations.

My professional background is in software engineering and full-stack web development. I have experience building scalable web applications using Laravel, Next.js, and React, as well as developing real-time systems and AI-powered platforms. However, I do not have a degree in civil engineering or professional experience in structural engineering, CAD software, or construction project coordination.

I respect the technical requirements of this position and believe it is important to be transparent about my qualifications. My expertise lies in software engineering, autonomous systems, and AI, which does not align with the core responsibilities of this role.

I wish you success in finding the right candidate for this position.

I have attached my CV for your reference.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
