I am writing to apply for the Canva Design Specialist Real Estate position at StratifyIQ. The opportunity to contribute to real estate marketing through design aligns with my experience building visually engaging digital platforms.

Through my full-stack development work, I have gained strong practical skills in design tools and UI frameworks. I use Figma for prototyping and wireframing, and I have built responsive interfaces using Tailwind CSS, Bootstrap, and MaterialUI. My focus has always been on creating clean, user-friendly layouts that communicate information clearly.

One relevant example is the AI-powered real estate application I developed. I designed the entire frontend using Next.js and Tailwind CSS, focusing on property listing presentation, search interfaces, and dashboard layouts. The project required careful attention to visual hierarchy, spacing, and mobile responsiveness to ensure a professional look across devices.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my design and development background can support StratifyIQ’s real estate marketing goals.

Sincerely,

Md Shahanur Islam Shagor
