I am writing to apply for the Projektmanager Technisches Projektmanagement position at Deutscher Bauservice GmbH. Your work on complex infrastructure projects supporting the energy transition, particularly offshore grid connection systems, is an area where I believe my technical project management skills can contribute meaningfully.

My background is in software engineering, where I have spent over four years delivering full-stack web applications. Throughout this work, I have developed strong project management capabilities: coordinating between developers, stakeholders, and external partners; managing timelines and deliverables; and maintaining clear documentation throughout the project lifecycle. I am accustomed to working in structured, process-driven environments where quality and reliability are non-negotiable.

One area that translates directly to this role is my experience with end-to-end project steering. In my previous positions, I was responsible for taking projects from requirements through to deployment, ensuring that each phase met quality standards and deadlines. I regularly communicated progress to stakeholders, managed expectations, and adapted plans when challenges arose. This experience has given me a practical understanding of how to coordinate multiple work streams and keep projects on track.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project management experience can support your offshore grid connection projects.

Sincerely,

Md Shahanur Islam Shagor
