I am writing to apply for the Bauleiter (m/w/d) - Windparkbau position at Deutscher Bauservice GmbH. Your company's role as a growth champion in the renewable energy infrastructure sector is impressive, and I am interested in contributing to the construction of complete wind farm infrastructure.

Through my professional experience as a Web Developer, I have developed strong project coordination and documentation skills. I have experience planning, coordinating, and monitoring multi-phase projects, ensuring quality control and efficient resource allocation. I am accustomed to serving as a bridge between different stakeholders, managing timelines, and maintaining clear documentation throughout project lifecycles.

In previous work, I have been responsible for overseeing the full delivery of web applications, from planning and coordination to quality assurance and final delivery. I have experience creating detailed specifications, monitoring progress, and ensuring that all deliverables meet required standards. These skills in project oversight, documentation, and quality control are directly transferable to managing construction Gewerke.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am willing to travel across Germany as required for this role.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination and quality management skills can contribute to your wind farm projects.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
