I am writing to apply for the Bauleiter (m/w/d) - Windparkbau position at Deutscher Bauservice GmbH. Your company's role as a reliable partner in innovative construction projects across Germany, particularly in wind park infrastructure, is impressive. I am interested in contributing to the Energiewende through this position.

Through my professional experience as a Web Developer, I have developed strong skills in project coordination, documentation, and quality assurance. I have experience planning and executing complex technical projects, coordinating between different teams, and ensuring that all deliverables meet specified requirements. I am accustomed to maintaining clear documentation and tracking progress against deadlines.

In my previous work, I was responsible for overseeing the full lifecycle of web application projects, from initial planning and resource allocation to deployment and maintenance. This involved creating detailed specifications, coordinating with stakeholders, monitoring progress, and ensuring quality standards were met. I am confident that these project management and coordination skills transfer well to the construction site environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I hold a valid driving license and am prepared for nationwide travel as required.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project coordination and quality assurance experience can contribute to your wind park construction projects.

Sincerely,

Md Shahanur Islam Shagor
