I am writing to apply for the Projektplaner/Terminplaner position at Deutscher Bauservice GmbH. The role of coordinating complex infrastructure projects for the energy transition is both challenging and meaningful, and I am interested in contributing to your team.

My background is in software engineering and system architecture, where I have developed strong project coordination and analytical skills. In my professional experience as a Web Developer, I have managed end-to-end project delivery, coordinated with multiple stakeholders, and maintained clear timelines across development cycles. I am accustomed to tracking progress, identifying bottlenecks, and adjusting plans to meet deadlines.

One area that particularly interests me is the structured approach to planning and resource management. While I do not have direct experience with Oracle Primavera P6, I have worked with project tracking tools and understand the importance of critical path analysis, resource allocation, and risk mitigation. My technical background enables me to quickly learn new software systems and apply them effectively in complex project environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination skills can contribute to your infrastructure projects.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
