I am writing to apply for the Projektmanager (m/w/d) Wegerecht und Fl˃chensicherung position at Deutscher Bauservice GmbH. Your work in developing wind energy, photovoltaic, battery storage, and power line projects directly supports the energy transition, and I find that mission genuinely compelling.

Although my professional background is in software engineering, I have spent several years managing complex technical projects from planning through delivery. In my work as a Web Developer, I was responsible for coordinating with internal engineering teams, external clients, and stakeholders to ensure projects were delivered on time and within scope. This required structured planning, clear communication, and consistent monitoring of progress against milestones.

One area that particularly interests me is the coordination of land securing and right-of-way processes. While my domain has been technology rather than real estate, the core project management skills are directly transferable: creating detailed project plans, tracking deadlines and renewals, maintaining registers, preparing status reports and KPI dashboards for management, and serving as a reliable point of contact for multiple parties. I am confident in my ability to apply these skills to the Fl˃chensicherungsprozesse at Deutscher Bauservice GmbH.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
