I am writing to apply for the (Senior) Influencer Marketing Manager â Digital Retail position at salted GmbH. Your focus on building measurable retail impact through influencer marketing and data-driven campaign management aligns with my experience in building systems that track performance, automate workflows, and deliver actionable insights.

My background is in software engineering, where I have spent over four years developing full-stack web applications and data-driven platforms. I have built systems that handle user engagement tracking, real-time analytics, and automated reporting. These skills give me a strong foundation for managing KPI frameworks, analyzing campaign performance, and optimizing marketing spend based on data.

In previous work, I developed platforms that required close collaboration with cross-functional teams, including product, design, and business stakeholders. I am comfortable working with tracking tools, interpreting data, and translating insights into practical recommendations. My experience with performance optimization and process automation directly supports the analytical and strategic demands of this role.

One area that particularly interests me is the intersection of technology and marketing. I have built systems that manage user journeys, track conversions, and automate communication workflows. This technical perspective allows me to approach influencer marketing with a data-first mindset, focusing on measurable outcomes rather than just awareness.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and look forward to discussing how my background can contribute to salted’s growth.

Sincerely,

Md Shahanur Islam Shagor
