I am writing to apply for the Windparkplaner position at Deutscher Bauservice GmbH. While my professional background is rooted in software engineering and AI systems, I bring strong project management, organizational, and technical documentation capabilities that are directly relevant to this role.

Through my experience delivering full-stack web applications, I have developed a structured approach to managing complex projects from initial concept through to deployment. I am comfortable handling multiple project phases simultaneously, coordinating with cross-functional teams, and maintaining clear documentation throughout the project lifecycle.

One area that particularly interests me is the opportunity to apply my organizational skills to wind energy projects. In my previous work, I was responsible for client consultation, requirement gathering, and presenting technical solutions to stakeholders. I am accustomed to being the point of contact for technical questions and maintaining thorough project records.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and organizational skills can contribute to your wind energy projects.

Sincerely,

Md Shahanur Islam Shagor
