I am writing to apply for the Projektentwickler position at Deutscher Bauservice GmbH. Your focus on driving renewable energy projects in wind and solar aligns with my interest in contributing to meaningful infrastructure development in Germany.

Although my professional background is in software engineering, I bring strong project management capabilities that are directly relevant to this role. I have experience managing full project lifecycles, coordinating with multiple stakeholders, and ensuring delivery within defined timelines and budgets. My technical background has given me a structured approach to problem-solving, risk assessment, and reporting.

Through my work as a Web Developer, I have regularly coordinated with clients, team members, and external service providers to deliver complex projects. I am comfortable with regular travel, engaging with landowners and authorities, and preparing clear reports for management. My ability to analyze requirements and optimize processes translates well to managing project portfolios in the renewable energy sector.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my project management skills and structured approach to your team. I have attached my CV for your review and look forward to discussing how I can contribute to your renewable energy projects.

Sincerely,

Md Shahanur Islam Shagor
