I am writing to apply for the Chief Marketing Officer (CMO) position at STARTPLATZ AI Academy. Your mission to build Germany's leading address for AI Weiterbildung resonates with my own focus on combining software engineering with practical AI applications.

What stands out to me is your emphasis on using AI as a lever to make content, campaigns, and processes faster and more cost-effective. As a Full-Stack and AI Engineer, I have hands-on experience integrating AI directly into production systems. I have built AI-powered features using OpenAI, Replicate, and AWS Transcribe, and I understand how to deploy these tools to automate workflows and reduce operational overhead.

In my professional experience, I developed the backend for an AI-powered financial application that used OpenAI assistants trained on custom datasets, voice-to-text conversion via AWS Transcribe, and automated PDF generation sent through AWS SES. I also built an AI-based real estate platform that integrated GPT models for intelligent property analysis and Replicate API for image processing, with role-based access and subscription plans. These projects required working with limited budgets and delivering measurable results through automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in this role because it combines AI, growth, and hands-on execution. I have attached my CV for your review and look forward to discussing how I can contribute to scaling STARTPLATZ AI Academy.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
