I am writing to apply for the (Junior) Referent Wertpapier- und Depotgeschˆft position at GENO Broker. Your role as an online broker within the Genossenschaftlichen FinanzGruppe, supporting Volks- und Raiffeisenbanken with digital trading platforms, is an area where I see a clear opportunity to contribute my technical skills and structured approach.

Although my professional background is in software engineering rather than banking, I bring strong IT affinity and a proven ability to learn new domains quickly. In my previous work as a Web Developer, I built and maintained scalable web applications using Laravel, Next.js, and MySQL. I handled tasks such as implementing authentication systems, integrating payment gateways, and optimizing database performance. These experiences required careful attention to regulatory and internal requirements, similar to the compliance-focused work described in your job posting.

One area that particularly interests me is process optimization. In my development work, I actively participated in improving workflows, automating repetitive tasks, and ensuring timely delivery of features. I am comfortable taking ownership of assignments, working independently, and communicating clearly with both technical and non-technical colleagues. I am confident I can bring this same reliability and problem-solving mindset to your securities and custody operations team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to apply my hands-on mentality and IT skills to support GENO Broker’s mission. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
