I am writing to apply for the Werkstattleiter Landtechnik position. Although my professional background is in software engineering rather than agricultural mechanics, I bring strong technical problem-solving abilities, experience leading projects, and a structured approach to managing workflows and teams.

Through my work as a Web Developer, I have designed and maintained scalable systems using Laravel, Next.js, and MySQL. I have implemented authentication, role-based access control, and payment integrations, and I have coordinated with stakeholders to deliver reliable solutions on schedule. These experiences have given me a solid foundation in managing technical operations and ensuring quality.

In my role at Explo-IT, I was responsible for planning and executing full-stack features, optimizing database performance, and supporting team members with technical challenges. I also deployed applications on Linux servers using Docker and Nginx, and I maintained CI/CD pipelines to ensure smooth delivery. This hands-on experience with system reliability and team coordination aligns well with the responsibilities of leading a workshop and maintaining high service standards.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
