I am writing to apply for the Servicetechniker / POS-Techniker position at Franke + Pahl GmbH. The focus on installing and maintaining modern retail technology in the field is exactly the kind of hands-on technical work I enjoy most.

Through my project work with embedded systems and hardware, I have developed strong practical skills that align well with this role. I have worked with devices such as Raspberry Pi, ESP32-CAM, and NVIDIA Jetson Nano, where I was responsible for setting up hardware, configuring software, running function tests, and troubleshooting issues on-site. This experience has given me a solid understanding of how to work with digital systems in real-world conditions.

One area that particularly interests me is the installation and commissioning of technical retail solutions. In previous work, I have built systems that required careful hardware assembly, network configuration, and coordination with end users. I am comfortable with the full cycle of mounting devices, testing functionality, documenting work, and resolving issues pragmatically when things do not go as planned.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to travel, work independently at customer sites, and take ownership of installations from start to finish. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
