I am writing to apply for the Werkstattleiter Landtechnik position at Riverstate Premium Recruiting. After reviewing the job description, I recognize that this role requires specific qualifications in agricultural machinery mechanics and workshop leadership that I do not possess.

My professional background is in software engineering and full-stack web development, with experience building scalable applications using Laravel, Next.js, React, and Node.js. I have worked on authentication systems, RESTful APIs, database optimization, and deployment pipelines. While these skills are valuable in the technology sector, they do not translate to the hands-on mechanical and technical requirements of a Landtechnik Werkstatt.

The position calls for an experienced Land- und Baumaschinenmechatroniker or similar trained professional with a Meistertitel or equivalent practical experience. I do not have this training, nor do I hold a Fˆ…hrerschein der Klasse B, which is listed as a requirement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I appreciate your consideration and have attached my CV for your reference. I wish you the best in finding a qualified candidate for this position.

Sincerely,

Md Shahanur Islam Shagor
