I am writing to apply for the Werkstattleiter Landtechnik position at Riverstate Premium Recruiting. While my professional background is in software engineering rather than agricultural mechanics, I bring strong organizational skills, technical problem-solving ability, and a proven track record of leading projects and coordinating teams effectively.

In my previous roles, I have been responsible for planning workflows, managing schedules, and ensuring that deliverables meet quality standards. I have experience coordinating between team members and stakeholders, handling administrative tasks such as documentation and task tracking, and stepping in to support technical questions when needed. These responsibilities align closely with the day-to-day requirements of leading a workshop team.

I am comfortable taking ownership of operational processes and guiding a team toward consistent, high-quality output. I approach problems systematically, communicate clearly with both technical and non-technical people, and adapt quickly to new environments. I am confident I can grow into the leadership responsibilities of this role with structured onboarding and hands-on support.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my organizational and technical background can contribute to your workshop operations.

Sincerely,

Md Shahanur Islam Shagor
