I am writing to apply for the Videoeditor und Social Media Manager position at MachsDirSelbst.Solar. Your mission to help people build their own PV systems is practical and impactful, and I appreciate the hands-on, learning-focused culture you describe.

Although my professional background is in software engineering, I bring a strong technical foundation, a fast learning curve, and genuine interest in content creation and digital marketing. I have experience building and adjusting websites using HTML, CSS, JavaScript, and modern frameworks, which directly supports the "kleine Anpassungen an unserer Website" responsibility in your job description. I am also comfortable working with AI tools and can quickly adapt to your video editing, graphic design, and social media workflows.

What stands out to me is your emphasis on learning on the job and taking ownership. In my previous work as a Web Developer, I regularly took initiative to learn new technologies independently and delivered features across frontend, backend, and deployment. I am confident I can bring that same mindset to video editing, content scheduling, thumbnail creation, and social media management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and look forward to the opportunity to contribute to your team and grow with MachsDirSelbst.Solar.

Sincerely,

Md Shahanur Islam Shagor
