I am writing to apply for the Chief of Staff to the CEO role at Valiantys. Your focus on helping engineering and service organizations transform through AI-enabled software delivery and platform engineering is a domain I find genuinely interesting. The opportunity to increase the CEO's leverage and strengthen executive alignment in a distributed, professional services environment aligns well with how I have worked across teams and projects.

In my professional experience as a Web Developer at Explo-IT, I worked closely with stakeholders and engineering teammates to design scalable applications, build RESTful APIs, and implement role-based access control and secure payment systems. Beyond the technical delivery, I was responsible for coordinating across teams, tracking progress, and ensuring that priorities were clear and decisions were followed through. This required structured thinking, clear communication, and the ability to hold multiple workstreams together without direct authority.

One area that particularly interests me about this role is building the executive operating rhythm and decision-making infrastructure for a distributed leadership team. In my previous work, I have created dashboards, reporting rhythms, and progress tracking systems that gave leadership clear visibility into execution, risks, and dependencies. I am comfortable turning complex information into crisp, decision-ready materials and ensuring that forums produce clarity and accountability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Valiantys as your Chief of Staff.

Sincerely,

Md Shahanur Islam Shagor
