I am writing to apply for the Founders Associate position at SPiNE GmbH. Your work on building a cybersecure Energy App Store and creating scalable software for the energy transition is genuinely interesting. I appreciate the opportunity to work directly with founders in an early-stage startup where ownership and impact are real from day one.

My background combines software engineering with a practical, entrepreneurial approach to building systems. I have experience designing and delivering full-stack applications, automating workflows, and optimizing processes across development and deployment. I am comfortable wearing multiple hats and taking initiative without needing close supervision.

One area that particularly interests me is process optimization and automation. In my professional work, I have built real-time features, integrated third-party services, and deployed applications using Docker, Nginx, and CI/CD pipelines. I also developed a real-time server health monitoring dashboard that streams live metrics using Socket.IO, which required structured problem-solving and cross-functional coordination.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to SPiNE’s growth and operational excellence.

Sincerely,

Md Shahanur Islam Shagor
