I am writing to apply for the Human Resources Specialist position at Mavida Health. While my professional background is rooted in software engineering, I have developed strong organizational, communication, and process-oriented skills that translate well into HR operations.

In my previous roles as a web developer, I worked closely with cross-functional teams, managed user data and access controls, and maintained clear documentation for internal processes. These experiences required attention to detail, confidentiality, and the ability to coordinate across different departments and stakeholders.

One area that I find particularly relevant is my experience implementing role-based access control and authentication systems. This work involved managing user roles, permissions, and sensitive data in a structured and secure manner, which aligns with the administrative and data management aspects of an HR role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the Mavida Health team.

Sincerely,

Md Shahanur Islam Shagor
