I am writing to apply for the Human Resources Assistant position at Recruit Lytixs Hire. Your organization's commitment to fostering a professional and employee-focused workplace aligns with my own approach to supporting team success through clear communication and reliable administrative support.

Through my experience as a software engineer, I have developed strong organizational habits, attention to detail, and the ability to manage multiple tasks simultaneously. I am comfortable maintaining accurate records, preparing documentation, and handling sensitive information with discretion. These skills are directly applicable to supporting HR operations, including recruitment coordination, employee file management, and compliance tracking.

In previous work, I collaborated closely with cross-functional teams, coordinated schedules, and ensured that project documentation remained current and accessible. I am confident in my ability to support the onboarding process, maintain employee databases, and assist with HR reporting and internal communications.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your HR team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
