I am writing to apply for the Director of Procurement position at Kardion. While my professional background is in software engineering and AI systems, I bring strong analytical capabilities, process optimization experience, and cross-functional coordination skills that are directly applicable to procurement leadership.

Kardion's work in the medical device space is compelling. Building reliable systems in healthcare requires precision, compliance, and careful vendor management. My experience designing scalable platforms and managing complex technical workflows has given me a structured approach to evaluating partners, negotiating contracts, and ensuring operational continuity.

In my professional experience, I have coordinated with multiple stakeholders across engineering, product, and business teams to deliver projects on time and within budget. I have managed third-party service integrations, negotiated technical requirements with external vendors, and maintained clear documentation throughout the procurement lifecycle. These skills translate naturally to sourcing, supplier relationship management, and cost optimization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background in systems thinking and operational coordination can contribute to Kardion's procurement operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
