I am writing to apply for the Bookkeeper position at Pickle. I understand that businesses often struggle to keep up with financial administration as they grow, and I appreciate the need for accurate, organized, and reliable financial management.

My background is in software engineering, where I have developed systems that handle complex data workflows, automate repetitive tasks, and ensure data integrity. In my professional experience as a Web Developer, I have worked extensively with databases, API integrations, and reporting systems that require precision and consistency.

One project that relates to financial administration is the AI Powered Financial App. In this project, I built a backend that fetches data from Google Sheets, processes financial information, and generates PDF term sheets. This required careful attention to data accuracy, secure handling of financial records, and reliable automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
