I am writing to apply for the Vertriebsleiter West position at Little John Bikes GmbH. Your emphasis on ownership, decision-making, and entrepreneurial leadership stands out to me. I am drawn to the idea of leading a region as if it were my own business, taking full responsibility for results, growth, and team development.

My background is in software engineering and AI, where I have spent years building systems from the ground up, making architectural decisions, and taking ownership of end-to-end delivery. This experience has taught me to think in terms of outcomes rather than tasks, to take initiative, and to drive continuous improvement. I approach challenges with a structured, analytical mindset and a focus on long-term value.

In my professional experience as a Web Developer, I have led projects that required coordinating across teams, managing priorities, and delivering measurable results. I have worked directly with stakeholders to understand business needs, translate them into technical solutions, and ensure that every decision supports the broader goals. This has given me a strong foundation in accountability, clear communication, and results-driven execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in taking ownership, driving growth, and leading with accountability can contribute to the continued success of Little John Bikes.

Sincerely,

Md Shahanur Islam Shagor
