I am writing to apply for the People Manager (m/w/d) position at HYROX World GmbH. Your global fitness racing series and the growth of the HYROX community are impressive, and I am drawn to the opportunity to support a dedicated team in a dynamic, international environment.

My background is in software engineering, where I have spent over four years building and maintaining full-stack web applications. This experience has given me strong digital literacy, a structured approach to problem-solving, and the ability to quickly learn and configure new systems. I am comfortable working with tools like Docker, Linux, and CI/CD pipelines, and I am confident I can apply this technical mindset to manage and optimize HR tools such as Personio or Deel.

One area that particularly interests me is the process optimization aspect of this role. In my previous work, I have consistently focused on improving workflows, automating repetitive tasks, and making systems more scalable. I would enjoy applying this same thinking to develop and streamline your People processes as the company continues to grow.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
