I am writing to apply for the Ausbildung Fachinformatiker/in - Daten- und Prozessanalyse position at dostani IT GmbH. Your focus on process automation, data analysis, and IT security aligns closely with my technical background and my interest in building systems that make operations smarter and more efficient.

Through my professional experience as a Web Developer, I have worked on analyzing business workflows and implementing automation solutions. I built and maintained full-stack applications using Laravel and Next.js, where I automated repetitive tasks, integrated RESTful APIs, and optimized database queries. This required a clear understanding of how data flows through a system and how to identify bottlenecks or inefficiencies.

One area that particularly interests me is data preparation and analysis. In my projects, I worked extensively with MySQL and PostgreSQL, designing schemas, writing complex queries, and ensuring data integrity. I also used tools like Redis for caching and Socket.IO for real-time data updates, which gave me practical experience in handling and processing data efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to your team and grow as an IT professional in a hands-on, supportive environment. I have attached my CV for your review and look forward to the opportunity to discuss how I can add value at dostani IT GmbH.

Sincerely,

Md Shahanur Islam Shagor
