I am writing to apply for the Werkstudent IT & Koordination position at dostani IT GmbH. As a Software Engineering student with hands-on experience in IT systems and a structured approach to problem-solving, I am looking for a working student role where I can contribute to real client projects from day one.

What stands out to me about dostani IT is the emphasis on practical learning and direct collaboration with the team and management. I appreciate that you work with modern tools like Microsoft 365 and HaloPSA, and I am eager to develop my skills in IT service coordination while supporting your team in ticket management, documentation, and technical research.

Through my studies and project work, I have developed strong PC proficiency and a methodical working style. I am comfortable researching technical topics, maintaining documentation, and preparing project materials. My background in software engineering gives me a solid foundation for understanding technical requirements and communicating clearly within an IT service environment.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available to work flexible hours that fit around my study schedule and would welcome the opportunity to discuss how I can contribute to your team. I have attached my CV for your review.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
