I am writing to apply for the Lead Consultant - Modern Workplace & Microsoft 365 position at dostani IT GmbH. The opportunity to take full technical ownership of client projects from initial consultation through to go-live aligns directly with how I prefer to work, and I appreciate the emphasis on personal responsibility and client partnership over ticket-based support.

What stands out to me about dostani IT is the focus on genuine client relationships and technical depth rather than scale for its own sake. The idea of being the technical face that clients trust, while having the freedom to shape solutions and standards, is exactly the kind of environment where I do my best work.

Through my professional experience as a Web Developer, I have independently managed full project lifecycles, including scoping requirements with clients, designing technical solutions, implementing systems, and overseeing go-live deployments. I have worked across diverse industries and have consistently taken ownership of the technical relationship with clients, translating their business needs into practical, reliable systems. This has given me the confidence to communicate technical concepts clearly to non-technical stakeholders and to lead projects from start to finish.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience with end-to-end project delivery and client consulting could contribute to the continued growth of dostani IT.

Sincerely,

Md Shahanur Islam Shagor
