I am writing to apply for the Praktikant/ Werkstudent im Bereich Digital Product position at Flix. The opportunity to contribute to the digital product development at FlixTrain, a company that is shaping the future of mobility, is something I find genuinely compelling.

Through my professional experience as a Web Developer, I have built and maintained full-stack web applications using Laravel and Next.js, developed and integrated RESTful APIs, and worked with databases like MySQL and PostgreSQL. I have experience analyzing data, optimizing queries, and ensuring that systems run reliably. These skills directly support the role's focus on data analysis, product development, and operational support.

One area that particularly interests me is the chance to contribute to the digital product and offer. In my previous work, I actively participated in feature development, collaborated with teams to improve workflows, and took ownership of tasks from planning to delivery. I am comfortable working with data, preparing reports, and communicating findings to support decision-making.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a current Software Engineering student, which has strengthened my structured and detail-oriented approach to work. I am available starting July 2024 for a period of at least 6 months. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the FlixTrain team.

Sincerely,

Md Shahanur Islam Shagor
