I am writing to apply for the (Senior) Paid Social Media Manager position at mammaly. Your mission to improve the health and happiness of dogs through premium supplements is compelling, and I am drawn to the ambition of building the best media-buying team in Germany.

My background is in software engineering and full-stack development, where I have spent over four years building and optimizing web applications, APIs, and real-time systems. This experience has given me a strong foundation in data analysis, structured testing, and performance optimization. I am accustomed to working with metrics, identifying bottlenecks, and iterating on solutions based on concrete data.

One area that particularly interests me is the structured approach to creative testing and funnel optimization described in the role. In my development work, I have built systems that require continuous A/B testing, hypothesis validation, and iterative improvement. I am confident that my ability to analyze funnels from first click to checkout, identify optimization levers, and work collaboratively with cross-functional teams will translate well into the paid social space.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset, structured working style, and eagerness to learn to the mammaly acquisition team. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
