I am writing to apply for the Senior Paid Search Manager position at mammaly. Your mission to improve the health and happiness of over one million dogs through a premium supplement portfolio is genuinely compelling, and I am drawn to the ambitious, data-driven acquisition culture you are building.

My professional experience is rooted in full-stack software engineering and AI, where I have spent over four years designing and deploying scalable web applications, managing complex data flows, and building systems that require precise tracking and optimization. While my background is technical, I have consistently worked on the intersection of product, engineering, and growth, where understanding funnel metrics, conversion architecture, and performance analysis has been essential.

In previous roles, I built and maintained subscription-based platforms with role-based access, payment integration, and real-time features. I have worked extensively with RESTful APIs, database optimization, and cloud deployment on AWS and Linux servers. These projects required me to think in terms of end-to-end user journeys, from the first interaction to conversion and retention, which aligns closely with the funnel-driven approach you emphasize.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical and analytical skills can contribute to scaling mammaly’s acquisition efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
