I am writing to apply for the Junior E-Commerce Manager position at QE GmbH & Co. KG. Your company's 17-year track record in international mail-order sales and the growth of your Averdo brand on major marketplaces like Amazon and eBay stand out to me. I am interested in contributing to your team in Osnabrˆ…ck.

My background is in full-stack web development, with a focus on building and maintaining e-commerce and marketplace platforms. Through my professional experience, I have developed strong IT skills and a practical understanding of digital processes that support online retail operations. I have worked on systems that handle order management, user coordination, and data flow between multiple stakeholders.

A relevant example is the multi-vendor e-commerce ecosystem I built using Laravel and MySQL. This platform connected customers, sellers, delivery agents, and logistics teams within a single infrastructure. I was responsible for the backend architecture, API development, role-based access control, and ensuring smooth daily operations across the system. This experience directly relates to coordinating daily business operations and managing order workflows in an online retail environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of discussing how I can support your team at QE GmbH & Co. KG.

Sincerely,

Md Shahanur Islam Shagor
