I am writing to apply for the Kaufm. Mitarbeiter (m/w/d) fˆ…r Onlineshop & E-Commerce (Teilzeit) position at QE GmbH & Co. KG. Your focus on automation, efficiency, and modern processes in e-commerce aligns well with my technical background and practical experience in building and maintaining online platforms.

Through my professional experience as a Web Developer, I have worked extensively with Laravel, Next.js, React, and MySQL to build full-stack e-commerce and marketplace applications. I developed a multi-vendor e-commerce ecosystem that included role-based access control, product management, order processing, and real-time notifications. This experience has given me a solid understanding of how online shops and marketplaces operate from both a technical and operational perspective.

One area that particularly interests me is the opportunity to support the optimization of your Shopify shop and marketplace business. While my direct experience is with custom-built platforms, the underlying principles of product listing management, pricing updates, customer communication, and workflow automation are areas where I have hands-on experience. I am confident I can quickly adapt to Shopify and contribute to the continuous improvement of your online presence.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
