I am writing to apply for the Working Student Product Management position at piur imaging Deutschland. Your work in 3D tomographic imaging, bridging the gap between ultrasound and CT, is a compelling example of how technology can improve access to affordable, radiation-free diagnostics. I am currently studying Software Engineering and have a strong interest in IT systems and medical technology, which makes this opportunity particularly relevant to my academic and professional goals.

Through my studies and hands-on project work, I have developed a solid foundation in software engineering, system testing, and documentation. I have experience with verification testing and release documentation from building full-stack applications where I was responsible for ensuring features worked correctly across different environments and documenting the process for team reference.

One area that particularly interests me is working directly with modern medical technology and gaining insights into clinical applications. In my previous work as a Web Developer, I collaborated with cross-functional teams to deliver reliable systems, and I am comfortable communicating technical details clearly to both engineers and non-technical stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the product team at piur imaging. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
