I am writing to apply for the IT Administrator / Technischer Support position at piur imaging Deutschland. Your work in bringing 3D tomographic imaging to ultrasound technology is genuinely interesting, and I appreciate the focus on making advanced diagnostics more accessible.

My technical foundation is built on Linux system administration, network configuration, and hardware-software integration. I have worked extensively with Docker, Nginx, Apache, and CI/CD pipelines, which directly supports the installation, remote support, and troubleshooting responsibilities described in your listing. I am comfortable preparing systems for deployment, diagnosing connectivity issues, and ensuring reliable operation in both office and field environments.

In previous professional roles, I was responsible for deploying and maintaining web applications on Linux servers, managing server health, and resolving technical incidents for end users. This experience required clear communication with clients and their IT teams, a pragmatic approach to problem-solving, and the ability to work independently under real-world constraints. I am comfortable with the combination of office-based work and planned travel that this role requires.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with your needs at piur imaging Deutschland.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
