I am writing to apply for the Sachbearbeiter Buchhaltung (m/w/d) position at fitbox GmbH. While my professional background is in software engineering, I bring strong analytical capabilities, a systematic approach to process optimization, and a proven ability to work with digital tools and complex data flows.

In my previous work as a Web Developer, I managed detailed data entry, validation, and reconciliation processes across multiple systems. I built and maintained databases, tracked transactions, and ensured data integrity through careful testing and verification. These responsibilities required the same precision, reliability, and attention to detail that accounting roles demand.

One area that particularly interests me is the opportunity to help introduce new digital tools and optimize workflows in the accounting department. I have hands-on experience with automation, system integration, and process improvement from my software development work. I am confident I can contribute to making internal processes more efficient.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my reliability, problem-solving mindset, and willingness to learn to the fitbox team. I have attached my CV for your review and look forward to discussing how I can contribute to your company.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
