I am writing to apply for the Werkstudent Projektmanagement Erneuerbare Energien position at enshift AG. Your focus on developing and implementing photovoltaic systems, battery storage, and heat pumps is directly aligned with the kind of impactful, real-world projects I want to contribute to. The opportunity to support the energy transition while gaining hands-on project management experience is particularly compelling.

My professional background is in software engineering, where I have spent over four years delivering complex technical projects. This experience has required me to develop strong organizational and coordination skills. I am accustomed to managing multiple parallel workstreams, tracking dependencies, and ensuring clear communication among diverse stakeholdersâ skills that directly translate to coordinating subcontractors, sales teams, and analysts on feasibility studies.

In my previous roles, I was responsible for overseeing project documentation, tracking open issues and deadlines, and ensuring quality assurance across deliverables. I have worked with both internal teams and external partners, which has taught me to communicate diplomatically and clearly, even when managing competing priorities and awaiting feedback from multiple sources. This structured and reliable approach would allow me to effectively support your project managers in the setup and operation of renewable energy installations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently pursuing a Bachelor of Science in Software Engineering, which provides a strong analytical and problem-solving foundation. I am eager to bring my organizational talent and technical understanding to enshift AG and contribute to your mission of driving the energy transition. My CV is attached for your detailed review.

Sincerely,

Md Shahanur Islam Shagor
